

# Learn The Putting Secrets They *Should* Have Taught You In Golf School That May End Your Three Putts Forever!

Dear Preferred Client,

If you'd like to finally discover the hidden keys to your putting success without wasting your time randomly practicing a new Golf Magazine tip every week, then this might be the most important letter you'll ever read.

Are you sick and tired of your first putt going 8 feet long and the next coming up 5 feet short? What you need is a pendulum putting stroke and a SIMPLE system to implement it. You have heard of a pendulum putting stroke. But what is it exactly, and how can you verify if you are doing it?

**Now there is a way.** It is called the 60/40 TLC 931 Putting Stroke Trainer© System. Back in 2000, I obtained the 60/40 System from Art Olfs a legendary Michigan golfer who competed in many USGA events and U.S. Opens. He developed this system with PGA instructors Mike Bender and Joe Hallett. Until now, I have widely kept it a secret. The premise behind it is to create a true pendulum stroke. In a true pendulum stroke the back swing and forward swing would be the same distance. However when there is energy exchanged, such as happens when the putter strikes a golf ball, the forward swing will be shorter than the backswing.

The system trains you from distances of 4, 8, 16, and 32 feet. While practicing with this system the feel of the 60/40 TLC 931 Putting Stroke Trainer© System translates into all other distances and allows you to **effortlessly** control your distance. This allows you to swing the putter with your arms and shoulders with minimal if any hand rotation, allowing the putter to have a better chance of staying square through impact!

**“Hey Scott, I just wanted you to know that I have been putting better in the last two weeks than I have in my life! Can you please send me the measurements you showed me on the putting green? The next day I played 9 holes at St. Ives, shot 32! I haven't played a full round since the tournament but I played 12 holes at my club last week and was 2 under! Thanks again bud!” Casey Wade, Head Golf Professional, PGA Member, High Meadow Ranch Golf Club. Magnolia, TX**  
**[www.highmeadowranchgolf.com](http://www.highmeadowranchgolf.com)**

Let me start by telling you the 60/40 TLC 931 Putting Stroke Trainer© System although widely used on the PGA Tour is virtually unknown to the

general golf population. And most so called golf experts don't even know about the secrets revealed by the 60/40 TLC 931 Putting Stroke Trainer© System.

Needless to say, that's where my big problem lies...

I made tons of mistakes along my own journey through golf. From the difficulty of adjusting to fast and slow greens, from three putting several times per round, to putting success and winning the 2000 West Michigan PGA and winning the 2004 U.S. Open Long Island Local Qualifier, and I kept asking myself after every new discovery or one putt: "Why didn't anyone teach me this stuff?!?" Hence, the release of the 60/40 TLC 931 Putting Stroke Trainer© System to the public. If you are like 19 out of every 20 golfers, you're likely making the same mistakes I was making with my putting (even if you are a PGA Professional like Casey Wade (see testimonial) you're likely making AT LEAST 1 of them).

And the sad thing is, **if you're following conventional wisdom** (even the techniques the so-called "golf experts" are teaching) **you're leaving your golf score at risk.** Actually, 9 out of every 10 golfers who meet a golf instructor and get a tip or two *still* go away more confused and discombobulated than before! Why is that?

There are likely many mistakes you are making right now that your golf instructor can't help you fix- because they don't know the solution (and they may have been part of the mistake in the first place). In fact...

**95.19% of all golfers have a handicap of 5 or higher (according to the United States Golf Association (does not include golfers without a handicap)). How much golf prosperity are you being deprived of because of what you don't know?**

Look, I'm not a big "doom and gloom" guy. In fact, I'm one of the most positive people you could ever meet. But the facts are the facts. ***Have you ever wondered why, with all the golf advice available in the world, so FEW people are improving at golf???*** Well, there are easy to identify reasons why this is happening. One of those reasons is the lack of systems in place for learning, and with the 60/40 TLC 931 Putting Stroke Trainer© you get a tried and true system used by

many of the world's best.

**“I took one putting lesson with Scott and a day later I made my first putt of the summer over 10 feet. I went on to make 4 more of similar length and two birdies on 17 and 18 and I finished with a 39! I was laughing it was so unbelievable.”** David Eggerichs, Motivity Pictures

## **With the 60/40 TLC 931 Putting Stroke Trainer© System you will discover:**

- What it feels like to truly have a pendulum stroke.
- A proven system that allows you to train excellent distance control.
- Solid distance control for short and long putts
- Increased odds of maintaining a square putter face

So there you have it. I love helping golfers improve their putting, and I want to help YOU eliminate those pesky three putts. If you've read this far and you haven't bought the 60/40 TLC 931 Putting Stroke Trainer© System yet, I have just one question for you: looking back 20 years ago, how much better would you have been then and how much better would you be now if you had a system in place that showed you how to putt the ball the correct distance? Looking forward 20 years, do you want to be in the same situation that you're in now? Still three putting?

Do you want to be under the same pressures, the same stress, feel the same uncertainty about your ability to get the ball close from 25 feet? Unless you do something different, you'll likely be in the same situation that you're in now 20 years down the road.

Don't do that! You deserve better. Seize it! Don't keep following conventional wisdom hoping things will get better. If you follow conventional wisdom, there's a 9 out of 10 chance you will continue to three putt and throw away several strokes per round- and I know you don't want that.

**What are you waiting for?! Click the Add To Cart Button to get YOUR copy of the 60/40 TLC 931 Putting Stroke Trainer© System and learn the putting secrets know one ever told you.**

**Take care, brush your hair, and I hope to hear from you or meet you soon!**
